EDUCATION

- **General Assembly, Washington, DC**
 - Web Development Immersive
 - Front End Web Development (part-time)
- **George Washington University, Washington, DC**
 - Master of Forensic Sciences, 2007
- **Carnegie Mellon University, Pittsburgh, PA**
 - Bachelor of Science in Biological Sciences with an additional major in Psychology, 2005

ABOUT ME

As an intellectually curious individual with a drive for solving problems, I combine my analytical background in forensic science with my passion for creativity to make a positive impact as a web developer for those around me.

RELEVANT EXPERIENCE

- **General Assembly, Washington, DC**
Web Development Immersive Student 2017

Completed course that covered programming fundamentals and skills needed to launch full-stack web applications. Designed and developed a portfolio of projects including:

 - Metro Simon: a game based on the classic Simon memory game; built with Javascript and jQuery.
 - Studii: a full-stack application for collecting and organizing bookmarks for all the resources one might need for studying web development; built with Ruby on Rails.
 - Endangered In The East: a group project that provides information on endangered species in North America; built with a Rails back-end and an AngularJS front-end.
 - Cache: a MEAN-stack application to track personal savings and expenses; built with MongoDB, Mongoose, Express.js, AngularJS, and Node.js.
