ABOUT

Innovative front end developer with 2 years experience building responsive, user-focused websites. As an intellectually curious individual with a drive for solving problems, I combine my analytical background in forensic science with my passion for creativity to build sites and applications that are informative, time-saving, and unique.

PROFESSIONAL EXPERIENCE

- **Federal Reserve Board, Washington DC**
  Jr. Web Designer/Developer   2017 - Present
  - Worked with team to redevelop company intranet site
  - Posted time-sensitive content to company public site
  - Updated 3 internal sites to make modern and responsive
  - Assisted site owners in troubleshooting and updating content
  - Created solutions to streamline and automate processes
  - Served as team representative in monthly UX meetings
  - Followed best practices for 508 compliance for accessibility

- **Bode Cellmark Forensics, Lorton, VA**
  DNA Analyst   2006 - 2017
  - Processed labwork for thousands of DNA samples
  - Performed data analysis and issued reports
  - Performed technical review of hundreds of cases
  - Managed projects to ensure deadlines were met
  - Trained new analysts

PROJECTS

- **Sample Tracker**
  How can we easily track forensic sample processing in a lab?
  - Created a proof-of-concept application with an intuitive user interface to allow users to input and edit sample information
  - Implemented visual cues so users can quickly determine next steps in the processing workflow

- **Cache**
  How can I easily track my personal finances?
  - Developed a responsive interface to allow users to create and manage savings accounts for easy personal budgeting
  - A full-stack application with full create-read-update-delete capabilities
